Glazing of partition panels

## SURGICAL - WINDOW

With the Surgical system, a glazed window panel represents one of the basic elements for the construction of operating theatres with maximum safety, sterility, hygiene, easy maintenance and sanitation.

The system in question is the PHARMA glazing system, offering double-sided glazing where the glass pane is in plane with the surface of the panel.

Its design makes it suitable especially for hospital environments.

## TECHNICAL DATA

### Type

Window Surgical - Pharma glazing across panel width

### Panel thickness

180 mm

220 mm

250 mm

### Structural opening dimensions

#### width

1000 mm

850 mm

#### height

1050 mm

1050 mm

### Glazing

Antireflective, thickness 6 mm

laminated safety glass, thickness 6 mm

### Blinds type

electric blinds

magnetic blinds

mechanical blinds

**without blinds**

### Blinds control

on visible side

on non-visible side

remote (only for electric)

The notes must specify the number of the panel in which the blinds control will be installed.

### Hue and material

Metal sheet, hue RAL 9002

**Metal sheet, hue RAL 9016**

Stainless steel AISI 304

Powder coating Komaxit, hue RAL
